

CMCMUA RENEWABLE “GREEN” POWER PROJECTS

Facility Start-Up

Former Senator Nick Asselta and officials from the N.J. Board of Public Utilities, the Cape May County Board of Chosen Freeholders and the Cape May County MUA “pull the switch” on April 20, 2007 opening day of the Landfill Gas to Electricity Facility. This facility, which is owned and operated by the CMCMUA, was partially funded by a \$285,000 rebate provided through the NJBPU’s “Clean Energy Program”. Due to the environmental and economic success of this facility, a third 150 kilowatt per hour engine was installed and became operational in June 2008.
