

How Are Electronics Recycled?

Computers are recycled through a process called "demanufacturing." CPUs, monitors and peripherals are evaluated; the few units suitable for refurbishing are processed and sold as pre-owned computers. Other electronics are dismantled; hazardous and precious metals are removed for sale or proper disposal. Parts, such as memory chips, video cards, soundboards and mother boards are sold for reuse; leaded monitor glass is marketed to companies that manufacture new monitor glass; other materials such as the computer's plastic case, wood from TV consoles and remaining metal are sold as scrap.

Other Options For Computer Recycling

Battery Recycling

Rechargeable Batteries have hazardous components and must be recycled. Visit www.rbrbc.com to find a nearby drop off location or bring them to the CMCMUA TS or SLF. Single use disposable batteries do not have hazardous components. Dispose of single use batteries with regular trash.

LANDFILL COMPLEX (SLF)
2050 ROUTE 610
WOODBINE, NJ

Monday - Friday, Saturday/Holidays

TRANSFER STATION (TS)
650 SHUNPIKE ROAD, ROUTE 620
BURLEIGH, MIDDLE TOWNSHIP, NJ

Monday - Friday, Saturday/Holidays
