Construction Status Report - October 25, 2023 - Thomas J. LaRocco

<u>32nd Street Pump Station Piping & Pump Upgrades</u> - The purpose of this project is to replace piping, fittings, valves and appurtenances on the dry side of the well to remediate poor material conditions, and to improve the operational flexibility of the station. The installation of three (3) new sets of pumps and motors that were procured independently of this contract shall also be completed. Mobilization of bypass pumping equipment began on October 16th. By October 19th, the station was in full bypass mode. Demolition and removal of existing piping and pumping equipment in the dry well began on October 23rd. It is expected that demolition work will continue until November 5th, at which time the installation of new piping components is to begin.

Wildwood/Lower Region Furnish and Install New Centrifugal Blowers – The purpose of this project is to replace three of four existing blowers, and to provide new controls to the three new blowers and the single, existing rebuilt blower. These blowers provide process air to the facility's entire treatment system. Two (2) of the new blowers will have capacities that are less than those of the original units so as to more efficiently accommodate off-season demands. This project was awarded on March 1, 2023. Notice to Proceed was issued, effective March 22, 2023. A preconstruction meeting was held on April 5, 2023. Due to equipment lead time requirements, the Contractor does not expect to begin physical work until January, 2024. Currently, the review of technical submittals and material procurement is ongoing.

<u>Various Regions Disposal of RBCs and Other Miscellaneous Equipment</u> - The purpose of this project is to remove and dispose of various pieces of surplus equipment that are in poor condition in order to provide more working space at the Authority's Ocean City, Wildwood/Lower and Cape May Wastewater Treatment Facilities. Work includes the loading, hauling, unloading and disposal of nineteen (19) RBC shaft assemblies, two (2) storage tanks and, on an "if and where directed" basis, eight (8) storage containers and other miscellaneous treatment equipment. All assigned pay item work has been completed. Tasks recently completed by Garton's as part of the contract's contingency allowance include the installation of a new scum concentrator on the 2nd floor of the Wildwood/Lower Sludge Processing Building on October 12th, and the direct removal of three RBCs from the Ocean City treatment tank on October 16th.

Demolition and Disposal of Various Structures and Equipment at the Sludge Composting Facility - The purpose of this project is to demolish and dispose of structures and equipment at the Sludge Composting Facility that have not been in use since the fire of 2015. The Reactor, Amendment, Operations and Maintenance, Blower, and Storage Buildings, as well as Chemical and Odor Control Facilities with related appurtenances are to be safely removed in accordance with the governing regulations. This project was awarded on September 6, 2023. Notice to Proceed was issued, effective October 10, 2023. A preconstruction meeting was held on October 17, 2023. It is expected that the Contractor will mobilize onsite on November 13, 2023.
