MEET & GREET

Don't miss the Association's MEET & GREET PARTY on the 8th Floor at the Bally's Spa on Tuesday night, May 11, 2010. It's always a great way to see your old friends and meet new ones. Our "Caribbean Night" theme will be complimented by Bally's mouth-watering cuisine. Attire is casual, New Jersey style or as they do in the Islands. Either way, slow down your pace and relax the Caribbean way at this year's Meet & Greet Party.

THURSDAY EVENING ENTERTAINMENT

Each year your Conference Committee gives much thought to satisfying your appetite for yet another memorable Grand Finale. So why should 2010 be any different?

Then take out your calendars, planners or that ribbon you tie around your finger and make note to attend the interactive comedy sensation

THE AMAZING 70'S PROM

on Thursday, May 13th

From the moment you enter Bally's Ballroom, you step into a world of laughter and fun in this hilarious audience participation comedy Prom. Take part in the show or enjoy watching the antics as the faculty tries to stop this annual coed ritual from spinning out of control. Bring your dancing shoes as usual, but also pack that 70's disco shirt you stashed away.

John Travolta stand back!

WEF-NPDES Permits Program Overview
Course for Permittees Including New and Emerging Issues - Day 1

(8:30 a.m. to 4:45 p.m. Monday and

8:30 a.m. to 4:45 p.m. Tuesday)

6.5 & 6.5 WW TCH Hours per day respectively

NJDEP Course No. 03-01 10 31 2-0

CPWM No. NJWEA-DLGS-511 Tech. 6.5 Hrs.

Sponsored by the Water Environment Federation
 And the US Environmental Protection Agency

Who should attend?

The workshop is targeted to permit applicants and permit holders. Public interest groups, environmental consultants & engineers, environmental & municipal attorneys, and regulators would also benefit from this course.

Course Objective

The National Pollutant Discharge Elimination System (NPDES) permitting program is authorized under the Clean Water Act (CWA) to control the discharge of pollutants from industrial and municipal point sources to waters of the United States. The more significant sources of pollutant discharge are typically issued individual NPDES permits (i.e., a facility-specific permit containing unique conditions). Over the years, the development process for NPDES permits has continued to increase in complexity due to development of new and more complex technology-based requirements (e.g., new effluent limitations guidelines), the adoption by States of comprehensive water quality standards, and the development and incorporation of total maximum daily loads (TMDLs). The permit development and issuance process requires a significant investment of resources for both the permitting authority and the permit holder. Currently, EPA provides training on the basic requirements and methods for issuing NPDES Permits to permit writers. This course will provide similar training for the permit holder and focus on a process to foster increased involvement in permit development and implementation. The objective of this course is to increase understanding by both the permit holder and permit writer as a means to help reduce permit issuance time and lead to increased permit compliance.

The program will include lecture and discussion, and provide the attendee with a strong understanding of the purpose of the NPDES program as well as the mechanics for developing, issuing, and implementing an NPDES permit.

Legal issues to consider as a permit holder will be included in the discussion of the overall program. The course will also provide a synopsis and review of new innovative tools that workshop attendees may consider. This will include discussion of electronic tools currently available and also ones being developed that will help permit holders better organize data needed for permit issuance. There will also be discussion of new water quality approaches

such as watershed-based permitting and water quality trading.

Course Instructors

A team of instructors with varied experience will teach the course. Instructors will include senior EPA headquarters and EPA regional staff, as well as non-EPA experts. This mix will provide the perspectives from the view of the permit holder and permit writer, and detailed experience with many different permitting scenarios.

Patrick J. Bradley Pat Bradley is a Senior Scientist in the Washington, DC office of LimnoTech. Pat's areas of expertise include NPDES permitting, water quality studies, watershed management, wet weather issues, and TMDLs. Prior to joining LimnoTech, Pat was the Assistant Branch Chief of the State & Regional Branch of the Water Permits Division at EPA Headquarters in Washington, DC. He has 25 years of experience in the field of water quality protection and NPDES permitting, including permit writing, permit implementation, water quality criteria development, and research on the effects of wastewater discharges.

Gary Cohen is Special Counsel with the legal firm of Hall and Associates in Washington, DC and has been involved in the practice of environmental law for thirty years. He represents clients on Clean Water Act related issues, including NPDES permit negotiation, NPDES permit appeals, compliance counseling, wet weather programmatic issues, pretreatment and other Clean Water Act-related issues. In addition, his expertise includes NPDES and pretreatment litigation defense, regulatory counseling and hazardous waste counseling and litigation. Mr. Cohen is the author of numerous publications on NPDES, pretreatment and other environmental matters.

David Hair is an Environmental Engineer in the Office of Wastewater Management at USEPA Headquarters in Washington, DC. He has over 20 years of experience in Clean Water Act program implementation with a focus on NPDES permitting and the national pretreatment program. David has worked as an EPA contractor conducting inspections and audits of direct and indirect dischargers, as the Pretreatment Program Coordinator for the Oregon Department of Environmental Quality, as EPA Headquarters Team Lead for an NPDES Program Training and Oversight Team, and most recently as an NPDES/Watershed permitting specialist with the Tennessee Department of Environment and Conservation (while on detail from EPA). For the past 10 years, David has been a lead instructor for USEPA's NPDES Permit Writers' Course and has conducted more than 60 week-long courses for over 2,000 participants. As an EPA contractor, David was a co-author of the 1996 NPDES Permit Writers'

Manual, and is actively involved in the current effort to revise the 1996 Manual.

Course Outline

- The scope and regulatory framework of the NPDES program.
- The permit application process, permit issuance, and an overview of permit components.
- Technology and water quality issues related to effluent limitations.
- Other permit issues including: monitoring and reporting requirements; special conditions; and administrative procedures.
- Permit compliance and enforcement (case study examples provided).

Momentum is growing, and calls are being made, for a legislative opening of the Clean Water Act. It is widely recognized that water quality improvements have generally reached a plateau and supplemental programs, regulations and tools are now needed. Otherwise the water quality gains realized over the past 35+ years will be threatened if not diminished. This 1-day Interactive Workshop, organized by the American Academy of Environmental Engineers (AAEE) is an opportunity for Workshop participants to "sound off" on legislative needs. AAEE has assembled a top level expert panel to offer perspectives on the Act's history, future trends, and sector experiences.

Attend this Workshop and get details on the latest developments and what's on the horizon. Engage in small discussion break-out groups and help craft specific possibilities for the Clean Water Act and strategies for leveraging the expertise of engineers and scientists to more effectively influence policy and regulation. The workshop outcomes will be published as a resource for use by national organizations and legislative staff.

Speaker: Rich Taylor, Machinery Services Corp., Rapid Pump & Meter Service Co., Inc.

This seminar will focus on the importance of proper application considerations, predictive and preventative measures as well as specific maintenance for Pumps and Blowers. Proper application of products will be presented, as well as immediate implementation of a program of maintenance even when the equipment is still under warranty. Training of personnel in the correct methods is vital to a successful lifespan for these critical systems.

Discussion Format

EPA and NJDEP appointees will each be afforded an opportunity to present a 5-10 minute update on what is new in their agencies that might be of interest to the wastewater and water supply community. Q&A Session will follow. **People who have questions for USEPA and NJDEP administrators are encouraged to contact Tom Amidon (TAmidon@omni-env.com) to reserve the opportunity to ask it or to have it asked anonymously during the session.**

Panelists:

George Pavlou, Deputy Regional Administrator
United States Environmental Protection Agency, Region 2
Commissioner or Appointee
New Jersey Department of Environmental Protection

Example Topics of Interest:

1. Priorities of new management
2. Status of ARRA Funding
3. Implementation of Permit Review Task Force Recommendations
4. Status Wastewater Management Plans
5. Implementation of Nutrient Criteria Enhancement Plan

NJWEA Spring Fling - 2010

Operations Challenge

May 10 & May 11

Come Join Us! At the NJWEA 2010 Annual Conference

Teams / Judges / Support Staff / Sponsors:

The NJWEA has once again decided to host an Operations Challenge Competition. This competition will be held during the **NJWEA's 95th Annual Conference and Exposition** in Atlantic City, NJ. While the Conference is at Bally's Atlantic City the Operations Challenge **Spring Fling II** will be held at the adjoining Caesars Atlantic City. The dates for the Spring Fling II are May 10 and May 11, 2010. On Monday the Process Control and Laboratory Events will take place, along with the SDR Shoot Out. Tuesday the Safety, Collections, and Maintenance Events will be taking place.

Information about the NJWEA Spring Fling can be found at www.cmcmua.com/springfling. If you have a question, please feel free to contact Michelle Geisinger.

For more information about the NJWEA Conference visit their website at www.njwea.org.

Your support is badly needed again this year so as the visiting teams said "A first class event" can be had again in 2010.

We do hope you can support the conference challenge. Stop in to cheer the teams on Monday & Tuesday in the Caesars Ball Room.

FACTS:

Teams come from all across the Country and Canada.

We have room for 20 teams. Registration began in January and will run through March. Registration will be on a first come first served basis. Encourage your State Team to complete.

As is our standard, we will try to follow the rules and regulations of the national competition to the best of our ability. This year we will be show casing the new Wilo Maintenance Event.
